

The route options

We considered a shortlist of four different options for the Link Road and a further four options for the section that includes the Petone interchange. These options were evaluated to consider criteria such as ecology, archaeology, cost, resilience and landscape/visual/recreational implications. A map of the options is shown below while more information is available on pages 4 and 5.

Once you have reviewed this information, we would like your comments on a number of questions. This will help us refine our proposals and select a preferred route that we will investigate in more detail.
